

NP7 — Mastery System

How riders' levels & skills work · built to sync with wind.coach · 21 Jun 2026

The four mastery stages

Beginner → **Intermediate** → **Advanced** → **Pro**. Every rider sits at one overall stage.

Skills define each stage

35 windsurf skills across the stages — e.g. Beginner: *Uphaul, Rigging, Beach start*; Pro: *Forward loop, Wave riding, 40kn+ control*. Completing a stage's skills moves a rider up. The catalog is editable; each skill has a short label + a full description.

How a level is set

- **Self-declared** — the rider rates themselves.
- **Coach-suggested** — a coach proposes a stage (private until the rider accepts).
- **Coach-verified** — confirmed by a coach → shows a ✓ badge.
- **Auto-derive** — ticking a rider's skills auto-advances their verified stage when a tier completes.
- **Coach-managed by default** — riders trust their coach to set & verify; they can opt out.

Where it happens

- **Rider** (member portal): their stage, per-stage progress, earned skills, and what's next.
- **Coach** (admin): ticks skills + verifies — per rider, or a whole trip's cohort at once.

Data model (Supabase)

contacts	level, self_level, level_status, coach_can_manage_level
level_milestones	the catalog — key, label, description, tier
contact_milestones	which skills a rider has achieved
contact_level_history	the progression timeline

wind.coach integration

Riders track all year on **wind.coach**; NP7 trips are where coaches *verify* skills. The join is the milestone key — agree a shared skill taxonomy and `contact_milestones` ↔ `wind.coach` progress sync cleanly, so a rider's stage stays consistent across both. We keep those keys stable for exactly this.
